

Cooperative Light and Power has contracted with Central Applicators, Incorporation to perform mechanical brush mowing and tree clearing operations along the power line right-of-way from the intersection of County Road 3 and County Road 4 to the Nester Grade. Work will be starting on or about Monday, February 15, 2021, and ending approximately March 15, 2021. During the operations, any weak, leaning or diseased trees along the edge of the right-of-way will also be removed to help mitigate any potential future outages they may cause. This scheduled maintenance will help reduce costs and improve the reliability of the power line's electrical service. If you have any questions with regards to the vegetation maintenance activities that will be taking place in your service area you may contact Cooperative Light and Power at 218-834-2226 or 800-580-5881.
