Cooperative Light & Power

PLANNED OUTAGE RESCHEDULED

Due to the recent heavy rains and unfavorable weather conditions, Cooperative Light & Power has made the decision to postpone the planned outage originally scheduled for Thursday, November 5, 2026. With the significant rainfall, we want to minimize disruptions to members who may be relying on sump pumps to manage excess water.

Outage Details

The outage has been rescheduled for Thursday, November 12, 2026, beginning at approximately 10:00 a.m. and is expected to last two hours. An estimated 160 members will be affected.

Affected Area

The area affected by the planned outage extends from Press Camp Road to Highway 3 and along Highway 61 from Superior Shores to Betty's Pies.

Planned Work

During this time, our crews will replace aging underground electrical infrastructure and convert an existing overhead feeder line to underground service. This work is part of our ongoing efforts to maintain and improve the reliability of our electrical system.

Member Notifications

An initial notification call was made to affected members on Friday, October 30, 2026. An additional reminder call will be made on Tuesday, November 10, 2026, to the phone number associated with each member’s CLP account.

Important Note

We understand that any interruption in service can be inconvenient, and we appreciate your patience while our crews complete these important improvements.

Please note that the outage start time and duration may vary depending on weather and field conditions.

Contact Information: If you have any questions, please contact our office at 218-834-2226.
